

STRUCTURE ANALYSIS DRIVE

- 1.PROJECT MISSION: The purpose of this Project is to gain research about the disappearing landmasses and how we could find different ways to design the project and use the design ideas to gain money for the project.
- 2.PROJECT PROCESS: Have teams research and study different ways to produce a floating island and/or a ways to set up structures for people that are affected by the sinking islands. From there the teams will produce diagrams and reasearch as a way to elaborate on there design process, Then teams will put together renderings on posters as a way to advertise and gan awareness for the acual project.
- 3.PROJECT DELIVERABLES: Research, Diagram and a Design in the form of a rendering.
- 4.PROJECT CONTRIBUTION: Advertisement, Awareness and Funding
