## **Project Mission:**

The ability to see how other students and schools work on thier projects .By sharing their work on a one common centralized network. such as the PacRimStudio own blog. Thats controlled by the students v.s the multiple media outlets that are out there and which are hard to keep up with. This Blog gives students the chance to show others what they have worked on can get feed back from the blog followers.

# **Project Process:**

For students and project team members to record the process of the project .Digitaly archive their process and work which later on can be passed on to their school representive

## **Project Deliverables:**

TRACK THE PLASTIKI

PLASTIKI CONTROL CENTER EXPEDITION BY DD

2.5 BOTTLES ARE TRASHED FVERY HOUR IN THE US

It's time to do more.

architecture for humanity

Each Team will report their status to their school representive and submit their work that can be poster on the Pac Rim Studio Blog. This gives an chance to see what everyone else is up too and get feed back from their peers and blog followers.

And don't forget to check out the Plastiki crew's attempt to tickle your funny bone in the video below. From Rachael Hawkey What did the <u>IT'S A TUNA WRAP!</u> Olav has kept a record of the number of hours of sleep we get in every 24 hour period. It works out to be between 4.5 and 5.5 hours. It may be enough rest for Napoleon,
	Margaret Thatcher and Jo our skipper; but not for Olav and me. With this tough <u>WORD OF THE WEEK – ENERGY</u> . One of the many challenges faced on board the Plastiki is energy – now we all know about flicking off light switches and turning off standby lights, but when you've got to rely on pedal power for your energy, or rely entirely on the sun and wind, it
	Adventure Ecology (12) <u>SPROUTS 'R' US</u> We've been talking a lot about our Plastiki vertical garden recently and so we thought we'd put together a poster on how you guys can make a little something at home as well, in the form of a Sprout Garden. Sprout gardens are an easy way to grow

## Project Contribution:

By having a digital archiving system like the PacRim Studio blog that is controlled by the students. This give students and team representives a chance to educate not only other team members but potential and interested people who want to help out with the project. Eventually have a fan base following our
